Elk Report Users

Although this elk report does appear to be in the same general format as last year, there are several things you should keep in mind while using this information.

1. Like the deer report, we have a number issued column which shows the number of potential licenses for each hunting district by residency and license type. So as not to put hunters down twice, the number of general elk licenses and nonresident B10 licenses do not include special permit holders since they are accounted for in the special permit category.

2. The unknown category includes kills that had incorrect time period of kill information or incorrect age/sex information. It does not include late season kills. Thus, about half of the unknown harvest is legal archery harvest. The rest were likely also legal kill but would not fit into a legal set of conditions without altering some of the questionnaire information. The assumption we did make was that the hunting district of kill was correct if a current hunting district was indicated on the questionnaire.

3. If a kill was reported but the hunting district reported was not a valid district number, the kill was assigned to a regional number plus two Xs (i.e. 3XX) if the region was known. Otherwise, it went into the unknown statewide category "XXX". To throw this data out would bias the survey to a small degree. Also, it gives the user an idea of the unrecoverable errors we encounter in the survey process.

4. You may notice some small discrepancies if you check our calculated hunting success by tag type. This is the result of the unknown category being included in the calculation. It does not affect the hunting success calculated at the total and subtotal levels. The variation will be 2 percentage points at most.

5. The time period of kill and antler point information will be included in a separate report.

If you seen anything that needs more explanation or something that is a problem we have overlooked, please give John Cada a call.
